

## HAPPY BIRTHDAY TO SEMBCORP UTILITIES UK

Neil McGregor, the Group President and CEO of Sembcorp Industries, paid a special visit to Teeside to help UK employees celebrate 15 years as part of the Sembcorp family.

Mr McGregor, front right, watched as long serving employee Mick Trodden cut a special cake marking the milestone, with colleagues looking on.

The Wilton International-based utilities and services provider was bought out of administration by the Singapore energy utilities, marine and urban development business in April 2003.

Wilton was the company's first 'beachhead' in Europe and in the intervening years Sembcorp has spent more than £300 million transforming the business to provide reliable, competitively priced, low carbon power to customers.

Now, under Mr McGregor's leadership, the Sembcorp Group, with 7,000 employees in 15 countries, has carried out a comprehensive strategic review aimed at delivering success in the energy sector and has chosen the UK and Europe as one of four locations worldwide with significant growth potential.

Mr McGregor spent more than an hour outlining the company's new direction to members of the senior management team before listening to presentations on proposed UK expansion plans.

The move is likely to see Sembcorp develop new assets on the Wilton International site as well as expand its business elsewhere through strategic acquisition.

**Below, Neil McGregor outlines his vision of the future to the Sembcorp delegation.**
